GelComfort cushion with dual 3D Honeycomb and Air-Cell Beta Gel - technology

All day comfort.
GelComfort

Featuring patented dual 3D Honeycomb and Air-Cell Beta Gel technology, the GelComfort cushion provides a new level of comfort, designed specifically for people who have limited mobility.

The dual honeycomb design creates excellent pressure distribution, dispersing pressure on areas prone to discomfort and pressure sores, such as the hips and thighs, and assisting good blood flow. This is a concern for those with physical impairments, disabilities and elderly people with reduced mobility.

The 3D Honeycomb design redistributes weight and pressure whilst providing stability and support. Weight is more evenly distributed than with Memory Foam and other kinds of cushion materials, which we have proven with pressure mapping.

GelComfort prevents the build up of pressure in prone areas, ensuring that blood vessels and skin are not compressed or compacted when sitting. Extended periods of sitting in these conditions can lead to pressure sores, skin tears and ulcers.

3D Honeycomb Air-Cell Technology
Patented technology improves on memory foam and latex thanks to greater stability provided through a cell wall structure, preventing buckling and compression.

Beta Gel composition
Beta Gel is made from skin-safe oils, special polymers and gel elastomers, which provide excellent pressure distribution and superior elasticity. Beta Gel protects skin and encourages optimal blood flow through its dispersion of pressure.

Easy to clean with water
The GelComfort cushion is designed so it can be easily cleaned for continued use. The gel insert can be washed at temperatures up to 50 degrees, while the fabric cover can be machine washed.

Air-Cell Beta Gel keeps the cushion cool and ventilated
Each Air-Cell discharges warm air and absorbs fresh air with body’s movement to ventilate the cushion.

Product Information

Model Codes:
Large: GC-L2
Extra Large: GC-XL2

Dimensions:
L: 460 x 420 x 50mm
XL: 550 x 500 x 50mm

Material:
Cover: Polyester 100%
Gel: Polysiloxanes 100%

Notice: all products, product specifications and data are subject to change without notice to improve reliability, function, design or otherwise.
